

September 23, 2021

Day Two of the Open House will be conducted in-person at the Ventura Tech Bridge, or “FATHOMWERX” facility at the Port of Hueneme. Day Two will be focused on engagement between operational and technical stakeholders, with several project demonstrations conducted in the Port and at FATHOMWERX. Additionally, there will be opportunities for technologists to network, discuss collaborations for future ANTX-Coastal Trident projects, and propose solutions to technical needs briefed during the Day One program.

Presentations will be limited in order to avoid large gatherings and COVID-19 mitigation will be in place, to include masks worn indoors, limits at exhibitor booths, and individually-wrapped refreshments and lunch.

Agenda:
